Serialtest Async
RS-422/485 ComProbe

Wiring Guide

Frontline RS-422/485 ComProbe Cable Wiring

Because RS-422 and RS-485 do not subscribe to a standard connector pin out it is necessary to make your own connections.

1. 2-Wire Connection

The network transmit lines are connected to the RS-422/485 ComProbe receive pins.

Tap off the network transmit + line (TX+) and connect it to the RS-422/485 ComProbe RX+ pin, ensuring that the connecting wire is firmly attached by using the connector screw.

Tap off the network transmit - line (TX-) and connect it to the RS-422/485 ComProbe RX- pin, ensuring that the connecting wire is firmly attached by using the connector screw.

2. 4-Wire Connection

The network transmit lines are connected to the RS-422/485 ComProbe receive pins, and the network receive lines are connected to the RS-422/485 ComProbe transmit pins.

Tap off the network transmit + line (TX+) and connect it to the RS-422/485 ComProbe RX+ pin, ensuring that the connecting wire is firmly attached by using the connector screw.

Tap off the network transmit - line (TX-) and connect it to the RS-422/485 ComProbe RX- pin, ensuring that the connecting wire is firmly attached by using the connector screw.

Tap off the network receive + line (RX+) and connect it to the RS-422/485 ComProbe TX+ pin, ensuring that the connecting wire is firmly attached by using the connector screw.

Tap off the network receive - line (RX-) and connect it to the RS-422/485 ComProbe TX- pin, ensuring that the connecting wire is firmly attached by using the connector screw.
